Graduate students desire to surround themselves with individuals who will have an integral role in their growth and development. It is important for them to differentiate between allies and mentors and to understand where these roles may overlap. This workshop will feature strategies and advice from a panel of experts about how to be a more effective leader, mentor, and ally to graduate students, while defining the similarities and differences in these roles. Please join us for this discussion about allyship and mentoring graduate students.

This free virtual workshop is also open to anyone outside of the Purdue Community.

What is M@P?
M@P is a mentoring program designed for women and minority graduate students at Purdue University. M@P aims to improve the quality of graduate education through fostering mentoring relationships between graduate students and faculty or staff members.
