ACTIVITY WORKSHEET 1.2

Comparisons between Tractors and Pick-Up Trucks

Directions: Review the first column of characteristics and place a check in the spaces under each side column of these characteristics that apply to either a farm tractor or farm pick-up. Based upon this comparison, which do you believe would be more hazardous to operate?

Characteristics	Pick-up Truck	Farm Tractor
1. Equipped with SMV emblem (<i>Example</i>)		√
2. Designed to federal specifications		
3. Requires licensed drivers		
4. Has been crash tested		
5. Operates at high speed		
6. Designed for highway use		
7. Requires use of seat belts in most states		
8. Provides a zone of protection in event of an overturn		
9. Usually equipped with air bag		
10. Usually designed for multiple riders		
11. Can often be found in use 50 years after being manufactured		
12. More prone to rear overturn		
13. More likely to receive regular service and safety inspections		
14. Can legally be removed from use if found unsafe		
15. More likely to have exposed rotating parts		

Explain which vehicle you believe is more hazardous to operate.
