

- 11.1** Describe the basic characteristics of an agricultural confined space, including those regulated by OSHA.
- 11.2** Provide a hands-on definition of an agricultural confined space.
- 11.3** Describe the primary hazards found in and around agricultural confined spaces.
- 11.4** Identify the basic types of confined spaces that can be found in agricultural workplaces, including:
- Grain storage facilities
 - Forage storage structures
 - Manure storage facilities
 - Agricultural transport vehicles
 - Food/bulk storage containers
- 11.5** Describe the characteristics of toxic environments that can be found in forage storage structures such as silos.
- 11.6** List four of the common gases that can be found in manure storage facilities.
- 11.7** Identify the confined space-related hazards that are found in and around agricultural transport vehicles.
- 11.8** Identify the potential entanglement locations that can be found in agricultural confined spaces.
- 11.9** Describe the current employment restrictions, under the Fair Labor Standards Act, that apply to youth under the age of 16 who work around agricultural confined spaces.
- 11.10** Explain the differences between OSHA-exempt and OSHA-non-exempt agricultural confined spaces.
- 11.11** Explain the rights of young and beginning workers to refuse to perform certain hazards tasks for which they have not received training or equipped with the proper personal protective equipment.
- 11.12** Explain the right of all workers to file a complaint regarding unsafe work practices under the provisions of OSHA.
